to the Government of Mysore,
Bangalore

To

**The Municipal Commissioner,
Bangalore City.**

Sir,

Reduction of rate for pumping
installations for domestic pur-
poses.

4564

member 14/4

With reference to your letter No.GTO.321 dated 2nd April 1934 addressed to the Chief Secretary to Govt. and copy sent to me, I have the honour to inform you that the pumping installations, for which the reduction of rate has been recommended, are mostly for the houses where there are wells and the occupants intend utilizing the well water for domestic purposes.

The question of connecting pumping sets to the water mains has to be decided upon by the Water Supply Department. Hence, the reduction of rate recommended will not in any way inconvenience the other consumers, as apprehended by you.

I have the honour to be,
Sir,
Your most obedient servant,

✓ Copy forwarded, with compliments, to the Chief Secretary to Government, for favour of information.

ELECTRICAL DEPARTMENT.

Recd. -

G.O.No. 151.2354 dated the 5th June 1934 sanctioning for a period of one year a concession rate of 1/2 anna per unit for power supply to electric pumps installed for domestic purposes, to wells, cisterns etc., but not directly to water supply mains and pipes in Bangalore City.

2. G.O.No. 153.46-48 dated the 12th July 1934 conveying the approval of Government to the concession sanctioned in the above Government Order being extended to all the electrified places where power can be made available for the pumping installations of the kind referred to, and directing that the concession may be tried for a period of one year.

3. Correspondence ending with D.O. letter No. 333 dated the 16th March 1935 from the Chief Electrical Engineer on the subject.

G.O.No. ED3.2007-16

Dated Bangalore, 18th April 1935

In his D.O. letter dated the 16th March 1935 referred to above, the Chief Electrical Engineer has reported that there are at present 52 installations of pumps used for lifting water for domestic purposes, out of which 50 are connected to various wells such as bore-wells, ordinary wells etc., and the remaining two are connected to cisterns where the water from the supply main is drawn. As the rate of half an anna per unit now charged for installations to wells etc., is considered low, the Chief Electrical Engineer has recommended the adoption of the following revised rates for power supply to the pumping installations used for lifting water for domestic purposes.

(i) in the case of pumping installations on the cisterns where the water from the tap is collected, a rate of half an anna per unit be charged.

(ii) in the case of pumping installations which are installed on a bore-well or from an ordinary well, a rate of one anna per unit be charged.

2. Government are pleased to approve of the above recommendations of the Chief Electrical Engineer for a period of one year in the first instance.

3. The rate of one anna per unit mentioned in (ii) above should be charged in the case of the existing installations also after giving them sufficient notice, say, three months, of the enhanced rate now sanctioned.

4. The Chief Electrical Engineer is requested to report the result of the concession availed of at the end of this period of

of one year referred to above.
